## Executive Summary

This deliverable contains information regarding the first 3 biannual electronic newsletters of the EcoFuture project. The newsletter is distributed to project stakeholders, every 6 months, via email to inform the EcoFuture mailing list regarding news and events of the project and to direct them to EcoFuture social media and website for further information.

## 1. Introduction

### 1.1 Process

The newsletters for the EcoFuture project was developed by TUC and i.GREENs with the contribution of all the partners of EcoFuture. The concept, content and layout were discussed among all project partners. A draft was created and then sent to the partners for feedback. Once feedback was received, changes were made for the final version. The process for the development of the newsletter will be presented in further detail in the following sections section.

4 mailing lists were created to enhance the newsletters reach.

- i. TUC Mailing List
- ii. AIES Mailing List
- iii. NARC Mailing List
- iv. HWE & Damour Mailing List

However, due to the war in Gaza and political conflict in the region, only the TUC mailing list is being used for the dissemination of the results of the project.

To protect the privacy of the contacts, each partners sends the newsletter to their mailing list separately. There is also a ‘subscribe to our newsletter’ option on the EcoFuture website. The EcoFuture mailing list was developed by each partner by collecting stakeholders from each region.

### 1.2 Use & Accessibility

This report contains the first 5 newsletters published in M6, M12, M18, M24 and M30 of the project.

The newsletters are available via email and on the EcoFuture website <https://ecofuture-prima.eu/knowledge-hub/>

## 2. First Biannual Electronic Newsletter – M6

The first newsletter of M6 for EcoFuture follows the projects brand identity and shares to the public news, events and more details pertaining to the project.

### 2.1 Newsletter Process – M6

The development of the EcoFuture Leaflet followed a two-step process:

Step 1: The Draft Version of the Leaflet was reviewed by the TUC team for feedback.

Step 2: The Final Draft of the Leaflet was reviewed by partners and sent to each mailing list

Figure 1 is the final newsletter of M6. Each newsletter will have the same layout, however different content in regards to news & events of the project.

EcoFuture News!

A Socio-Ecological Approach to Combat Desertification for a Sustainable Future

### **FIRST BIENNIAL NEWSLETTER**

The EcoFuture project, funded by the PRIMA program, supported by the European Union started the 1st of April 2023 and has a duration of 3 years. Using the Jordan Valley as a test case, the overall project objective is to develop a climate-change adaptation program oriented towards improving the socio-economic welfare for people in the Mediterranean region. EcoFuture research activities are centered around three pilot sites across the Jordan Valley.

EcoFuture will create a better understanding of the interdependence of water, food, energy and environmental resources. It will catalyze an informed and transparent framework for determining trade-offs and synergies that meet demand without compromising sustainability. Through engaging communication activities EcoFuture will aid in increasing the awareness of citizens, stakeholders and policymakers towards a sustainable future.

### **EcoFuture Partners**

9 Partners create EcoFuture's Consortium and participate in the projects development.

link: <https://ecofuture-prima.eu/partners/>

### **Living Labs**

3 pilots will be constructed in existing demonstration sites in the Jordan Valley.

Link: <https://ecofuture-prima.eu/pilots/>

### 5.2 Results of Fourth Newsletter – M24

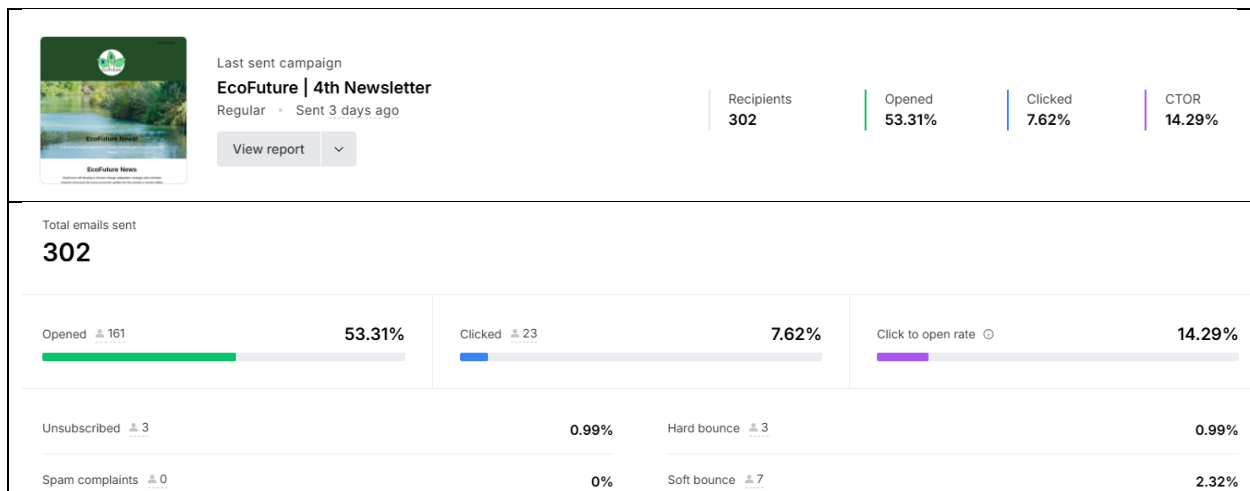

The fourth newsletter was sent to 302 emails from the TUC Mailing list. The Newsletter was sent out on Monday, 17/3/2025 at 11:42am.

The results in Figure 5.2 are from March 20<sup>th</sup>, 3 days after the Newsletter was sent. These results are only of the TUC mailing list. The mailing list was sent to 302 recipients with an open rate of 53.31%. 161 recipients opened the newsletter. This is approximately the same number as the previous newsletter which had open rate, 53.11%, and 162 recipients opened the newsletter.

The unique clicks are 123 and the total clicks 283. The top 3 links that were clicked:

1. [https://ecofuture-prima.eu/news\\_and\\_events/video-ecofuture-the-jordanian-pilot-site/](https://ecofuture-prima.eu/news_and_events/video-ecofuture-the-jordanian-pilot-site/)
2. [https://ecofuture-prima.eu/news\\_and\\_events/journal-of-environmental-management-an-integrated-participatory-framework-for-wefe-nexus-strategic-planning-the-jordan-valley-case-study/](https://ecofuture-prima.eu/news_and_events/journal-of-environmental-management-an-integrated-participatory-framework-for-wefe-nexus-strategic-planning-the-jordan-valley-case-study/)
3. [https://ecofuture-prima.eu/news\\_and\\_events/clustering-workshop/](https://ecofuture-prima.eu/news_and_events/clustering-workshop/)

The majority of recipients opened the newsletter when it was sent at 11:45-12:00. A decrease in link clicks can be observed from the previous newsletter that had unique clicks 316 clicks and the total clicks 499. This will be rectified by further promotion of the newsletter through EcoFuture partners and social media.
